

- ↳ Tell me about yourself
- ↳ Why did you apply for this position
- ↳ What makes you stand out

↳ Tell me about yourself  
My name is Omar, I am currently pursuing master's in computer science and I would describe myself as a quick learner and a hardworking person, that likes to and I like to set small goals everyday that I can achieve so I can improve myself daily. Few of my skills I have learned Data analysis, cybersecurity, software engineering, IT and machine learning.

So when I was looking for companies that were hiring students based on the skills I have and I came across TCS that were looking for people in the same domain and I believe I can be a good asset for the company for the knowledge I have and I would love to grow in my skills and I believe that TCS would be a good opportunity.

I believe that the skills I have, ~~will keep~~ them polished and updated on the recent technology. ~~feature~~

↳ I also am a self learner so ~~a lot~~ most of these expertise are self taught ~~that makes~~ and since I am a quick learner, I can adapt to ~~these~~ new set of knowledge. This would be a good asset for the company to keep.

what are my strengths & weakness.

↳ The strengths I possess/have that can be beneficial for the role/company.  
I am a team collaborator and I have experience working among different teams and document all the work for easy sharing.

↳ I also possess good problem solving skills where I can break down big problems and into chunks and work through them to get the desired output.
